

EL110

The EL110 Electric Cabinet Lock is a small, cast aluminium lock designed for cabinets having either swing or sliding doors. The Cabinet Lock can be mounted either vertically or horizontally and offers maximum flexibility and alignment adjustment for the installer. The EL110 can be controlled by any existing access control system or simply controlled through a remote key pad or key switch. This low cost, robust, solenoid driven lock is suitable for installations that have one or multiple cabinet applications.

Power to Lock / Power to Open

Changeable on-site

Continuous Rated Solenoid

Solenoid can be continuously powered

Multi Use

Suitable for swing and sliding doors

Flexible Alignment

Has 5 mm X Y adjustment after installation

Robust

One piece diecast aluminium body, very few parts

Low Current Consumption

Uses only 187mA with 12 volts dc

Industry Standard

Can be connected to any key switch, key pad, card reader or access control system

TRIMEC
