ASSA ABLOY, the global leader
in door opening solutions.

Ultimate Control is only a Touch Away

Interlock's Elevation is an easy to use system providing control of your windows through a simple touch screen.

The Elevation Window Control System can be configured to reflect the unique layout of your home. Zones, such as kitchen, hall or bedroom can be set up, providing you with flexibility when deciding which windows you would like open, half open, closed or in a venting position.

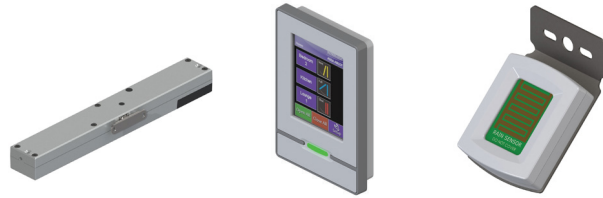

The Elevation is the perfect solution for hard-to-reach windows. Wide windows are also easily catered for with the installation of a pair of synchronised actuators that work together to ensure smooth movement and a tight window seal when closed.

The Elevation allows for a generous window opening, but can be easily restricted to prevent contact with external objects or eliminate the risk of young children falling.

Add a rain sensor to your Elevation system and your windows will automatically close if rain is detected.

Ultimate control is only a touch away with the option to close all windows at once when leaving the house, or locking up for the night.

System Components

Elevation Actuator Elevation Touch Screen Elevation Rain Sensor

Network adapters, synchronisation looms and power supplies also available.

System Features

- Intuitive touch screen keypad can control up to 30 windows with pre-set options 'closed', 'vent', 'half' and 'full'
- Ability to synchronise two actuators to cater for wide windows
- Strong, corrosion resistant stainless steel chain
- Chain length is adjustable meaning window opening can be limited
- Ability to group actuators into zones to be operated together
- Programme in a pin code to restrict access to keypad
- Suitable for awning or casement windows
- Can be fixed to timber or aluminium
- Elevation actuator made in New Zealand

System Options

- Touch screen or wall switch control option
- Actuators are available in a range of colours to complement any window design and/or finish
- Add 1 or 2 keypads per Elevation system
- Rain sensor option (add up to 4). Rain sensors can be allocated to a specific zone if required. They can also be configured to either vent or close upon rain detection, as well as re-open when dry
