Keyless Digital Deadbolt

Crime Prevention Partners

Never carry keys again!

Lockwood offers innovation in door locking solutions with the Keyless Digital Deadbolt.

Ideal for use on new doors or as a replacement on an existing door lock on your home, the Keyless Digital Deadbolt is also suitable for internal and light commercial doors such as storerooms and shop fronts.

The Lockwood Keyless Digital Deadbolt offers you flexibility with the use of a master pin code, 20 user codes and a visitor code that can be valid for up to two weeks. It also has a weather resistant keypad, low battery warning, key override for emergencies and many more features for your safety and convenience.

Touch Screen Keypad

The touch screen keypad has no mechanical buttons which means no trace of your secret pin code.

Pin Code Allowance

One master pin code will manage up to twenty user pin codes.

Cryptic Code Function

Prevent others from identifying your pin code during access. The cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

Visual Guide for Programming

For added convenience, a light guide will assist in the programming of your lock. (Refer to the programming guide)

Low Battery Warning

When battery power is below 30%, the low battery icon will begin flashing. If battery power is completely lost, use the key override.

Emergency Key Override

In the event your battery goes flat you have a key override that will prevent you from being locked out. Remember to always keep your keys in a safe and convenient place.

User Code that Expires

You have the ability to program a code that may last from 3 hours to 2 weeks. This is ideal when a tradesman requires access to your house for a few hours or when your neighbour is looking after your home.

Code Lockout Settings

Privacy mode allows you to deactivate the keypad from the inside providing a secure environment from others who may have pin code access.

By using your master pin, you can also restrict all user pin access. (Refer to the programming guide)

Weather Resistant Keypad

Note: Lockwood recommends the use of 4 x AA alkaline batteries.

Scan to view installation and programming video.

Product Details
