The world's favourite lock

burglaries do not occur by chance

-  There are now over 40,000 reported burglaries in New Zealand per year, although estimates indicate the figure to be higher, with many not being reported.
-  There is now a burglary approximately every 13 minutes.
-  Insurance claims for burglaries are now more than \$180 million, and about 20% of victims are uninsured.
-  Burglary victims have an increased risk of being burgled again within the following 6 months.
-  Most burglaries (approximately 75%) are committed during daylight.
-  Windows are the main point of entry for a burglar at approximately 66%, compared to 33% through a door.
-  The majority of burglaries (approximately 85%) are committed by the 'amateur' burglar who looks for an easy opportunity.
-  The majority of burglaries occur as a result of an opportunity in the form of open windows, unlocked doors or through lack of quality hardware.

take control

-  By fitting locks (as well as monitored alarms and security lighting) you can discourage the casual, amateur thief looking for an easy opportunity.
-  Fit window locks to prevent easy entry. Remember breaking glass makes noise and attracts attention.
-  Deadlock accessible windows to ensure that they cannot be opened easily even after glass is broken.
-  Glue glass louvre slats in place (use epoxy resin), or fix security bars across louvre windows.
-  Double deadlock front doors to prevent possessions being removed once the burglar is inside your home.
-  Fit patio bolts or deadlocks to sliding and hinged doors.
-  If you think there's a prowler outside don't get scared - get angry. Turn on all the outside lights, turn off all the inside lights, and make a very loud noise.
-  Join your local Neighbourhood Support and Neighbourly group.

www.ns.org.nz

securing your home

How secure your property is depends on your attitude to home security. A positive attitude means making the effort to ensure the most important steps listed below are taken.

- Fit reliable locks to all doors and windows.
- Install a quality monitored alarm system.
- Put security markings on all your property.
- Join your local Neighbourhood Support and Neighbourly group.

New Zealand Fire Service

A secure house should also be a safe house. For your safety, the New Zealand Fire Service recommends that each living area and bedroom be fitted with at least one smoke alarm and that every bedroom/living area has two ready means of exit in the event of an emergency.

- 1 Fit security stays to all accessible windows for ventilation when home. Lock windows when going out.
- 2 Fit locks to accessible windows.
- 3 Install external lighting and alarms as appropriate.
- 4 Fit locks to any window that opens in your garden shed. Lock ladders and tools in the shed or the garage.
- 5 Back doors are often fitted with a simple two lever mortice lock or key and knob which should be used in conjunction with a strong deadbolt. The back of your house is often more vulnerable than the front.
- 6 Fit a lock with a deadbolt to all external doors including the connecting door between the garage and the house.
- 7 Fit hinge bolts to outward opening hinged doors, top and bottom. Fit sliding door deadlocks with an anti-lift device to sliding patio doors. Fit patio bolts to deck or patio doors.
- 8 Keep shrubs trimmed so that they do not cloak any intruders' activities. Display warning signs.

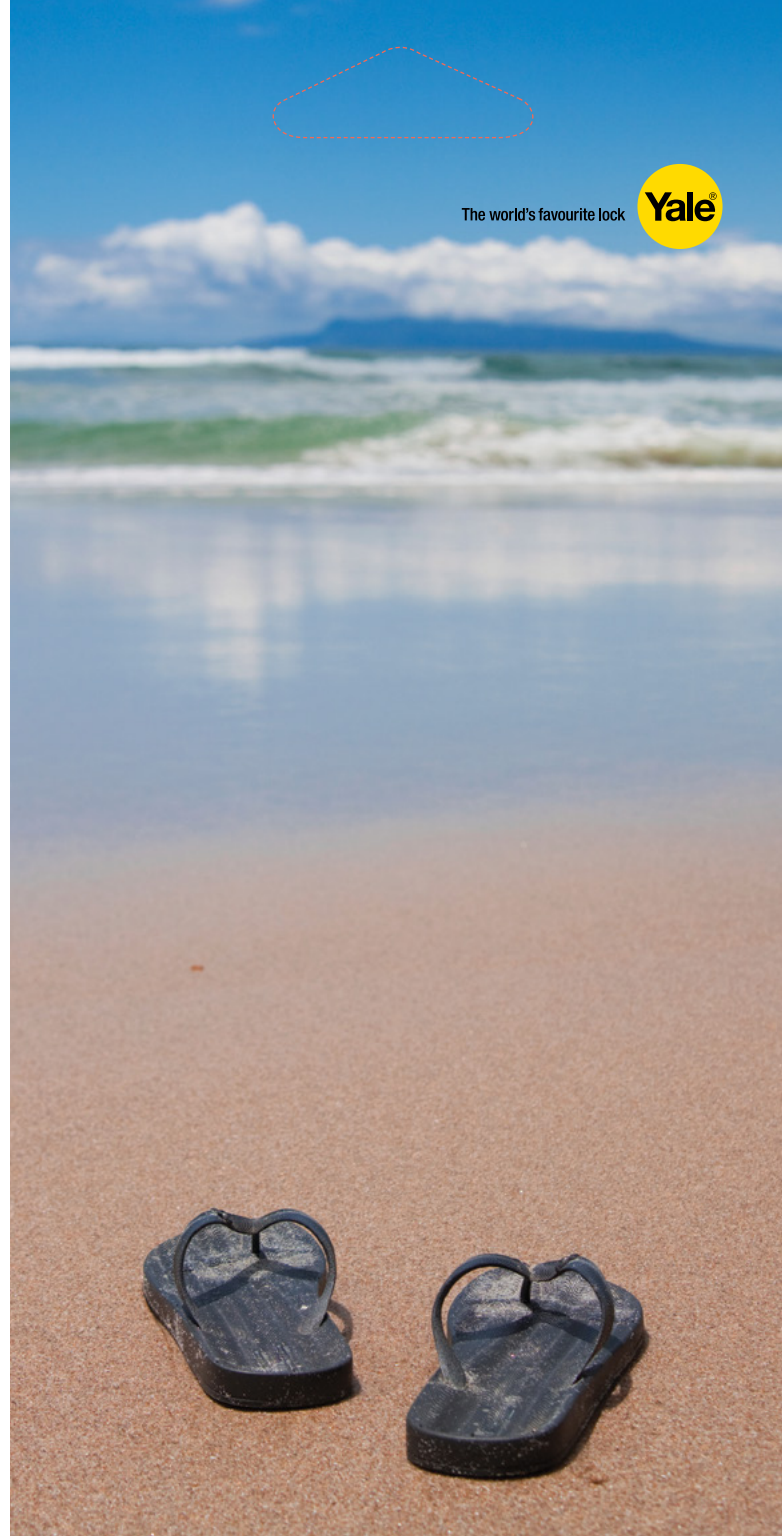

going away checklist

The following are useful ideas and should be used as appropriate for your situation

- 1 Lock all doors and windows, including garage, house and garden shed.
- 2 Cancel postal and newspaper deliveries.
- 3 Lock away all tools and ladders.
- 4 Arrange for lawns and shrubs to be trimmed while you are away.
- 5 Mark all your possessions with your own security mark.
- 6 Display "Beware" signs if you have a dog or alarm - advertise it.
- 7 Leave a radio on quietly.
- 8 Do not close your curtains.
- 9 Leave appropriate internal light(s) on, connected to a timer so lights are switched on at night only.
- 10 Advise your neighbours of your plans. Arrange for mail to be collected if possible or held by the postal service.
- 11 Advise your Neighbourhood Support or Neighbourly group.
- 12 Divert or unplug your phone.

- 3** **Select the right padlock**
- 5** **Handy Range Security**
- 7** **General Purpose Security**
- 9** **High/Maximum Security**
- 11** **Marine/Weather Security**

Why Lockwood padlocks?

- A high quality trusted brand
- A long history of quality and innovation in security products
- A world leader in padlocks
- A wide range of padlocks which ensures the right lock for all purposes

Advanced security

A double locked padlock has greater resistance to pulling and twisting, as found in the 334 padlock series.

Hardened shackle

Lockwood shackles are specially hardened to resist cutter and saw attacks.

Padlock body

Available in a range of materials to suit different applications.

Cylinder (locking mechanism)

Quality cylinder that enables a range of key differs for greater security and resistance to pulling and twisting.

Points to consider when choosing a padlock

Not all padlocks are created equal

The numerous padlocks available in the marketplace may look similar, but many can be easily opened without the key due to poor design and construction. When contemplating a padlock purchase there are five basic considerations to take into account:

LEVEL OF SECURITY

For effective security it is important to match the padlock with the level of security required.

SIZE

Always consider shackle and body size depending on the application.

QUALITY

High quality materials and precision locking mechanism. Lockwood is a trusted household name with a long standing reputation for high quality products.

CORROSION RESISTANCE

The Lockwood range extends from padlocks suitable for dry, protected environments through to extremely corrosive conditions.

KEYED ALIKE

The ability to have one key with multiple padlocks. Twin and quad display packs are available for one key convenience.

Select the right padlock

To help you select the right padlock for the level of security required, a scale has been developed that is quick and easy to follow.

The Lockwood range is divided into four categories: **Handy**, **General Purpose**, **High/Maximum** and **Marine / Weather** security.

Put simply, the scale follows one basic rule: The higher the number, the better the padlock security.

RATING 1 TO 3

HANDY

1 2 3 4 5 6 7 8 9 10

Basic protection for barrier and deterrent applications.

RATING 4 TO 6

GENERAL PURPOSE

1 2 3 4 5 6 7 8 9 10

Good to high security for general purpose applications.

RATING 7 TO 10

HIGH / MAXIMUM

1 2 3 4 5 6 7 8 9 10

High to maximum security for all applications including commercial and industrial.

RATING 7 TO 10

MARINE / WEATHER

1 2 3 4 5 6 7 8 9 10

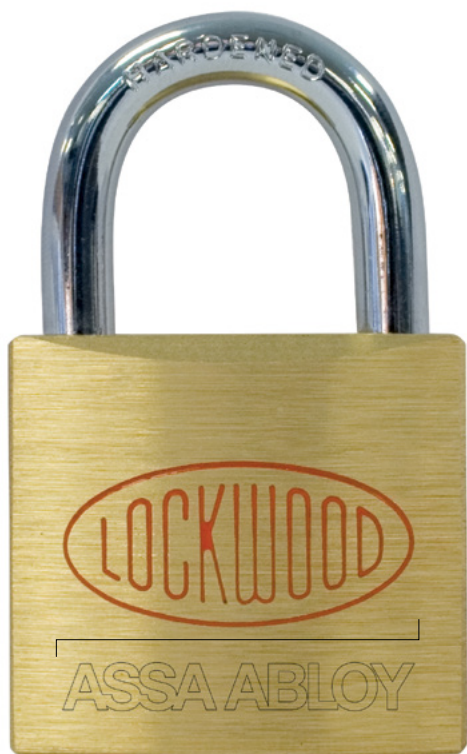

High to maximum security for non-corrosive protection.

Handy Range Security

Handy range for everyday security needs.

Recommended for: suitcase · letterbox · lockers · small bikes

110 SERIES

A range of padlocks designed for basic protection for barrier and deterrent. Solid brass body, hardened steel shackles with precision cylinders for improved security.

RATING 1 TO 3

1 2 3 4 5 6 7 8 9 10

Basic protection for barrier and deterrent applications.

141 SERIES

A 50mm stainless steel dial type combination padlock with key override for convenient, personalised and keyless security.

150 SERIES

A 25mm, 30mm and 40mm brass case side wheel combination padlock for basic protection or to serve as a deterrent.

150 series padlocks are suitable for use on applications such as luggage and sports bags.

CABLES

Tough zinc coated, multi-core plastic coated cables to ensure strong resistance to cutting attacks. Preset and re-settable combination cable options.

General Purpose Security

Increased protection for medium security needs.

Recommended for: mountain bike · gates · barbeque · garden shed

119 SERIES

Solid laminated steel lock body with a double bolted hardened steel shackle. Available in sizes 30, 40 and 50mm.

RATING 4 TO 6

1 2 3 **4 5 6** 7 8 9 10

Good to high security for general purpose applications.

120 AND 121 SERIES

Quality brass padlocks with double locking hardened steel shackles and precision cylinders. Protective shrouds in 40 and 50mm padlocks, with extended shackles available in 30 and 40mm padlocks.

LOOPED CABLES

Tough zinc coated, multi-core plastic coated cables to ensure strong resistance to cutting.

HASPS AND STAPLES

Hardened steel construction with strengthening ribs and rolled edges for extra protection.

High / Maximum Security

Top protection for maximum security needs.

Recommended for: motorbike · garage · quad bike · container doors

120N SERIES

Heavy duty solid brass bodies with protective weather resistant silicone jackets. Designed for high security applications and to resist the impact of harsh environments.

RATING 7 TO 10

1 2 3 4 5 6 **7 8 9 10**

High to maximum security for all applications including commercial and industrial.

130 SERIES

70mm cylindrical stainless steel disc lock with a hardened steel shackle. Suitable for high security applications and harsh corrosive environments.

334 SERIES

With brass, steel, stainless steel, and closed shackle options available the 334 series is ideal for those requiring strong, convenient and versatile padlocks.

270 AND 290 SERIES

Heavy duty solid steel case padlocks with a high corrosion resistant molybdenum steel alloy shackle designed for maximum security.

PADBOLTS

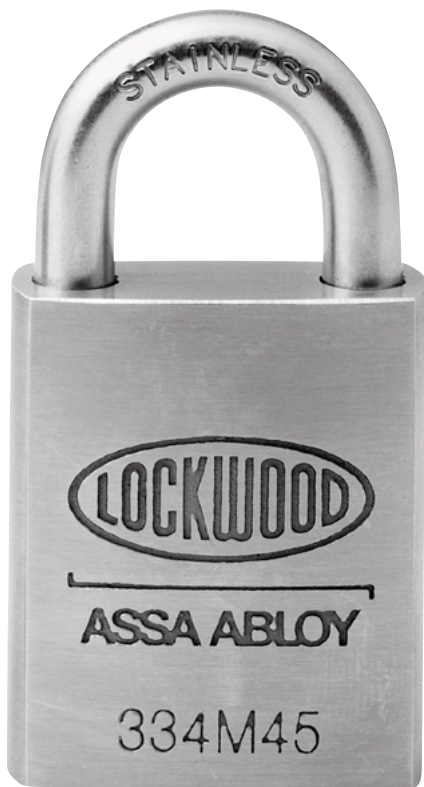

High cut resistant hardened steel construction with tamper resistant fasteners included. To be used in conjunction with Lockwood Padlocks for maximum security.

Marine / Weather Security

High to maximum security for non-corrosive protection.

Recommended for: boats · trailers · farm equipment · marine equipment

334 SERIES

Heavy duty solid stainless steel construction with the highest corrosion resistance rating. Suitable where high security and non-corrosive properties are required.

RATING 7 TO 10

1 2 3 4 5 6 **7 8 9 10**

High to maximum security for all applications including commercial and industrial.

CORROSION RESISTANCE RATING 3 TO 5

- 1 **Very low:** Not applicable for padlocks
- 2 **Low:** Dry protected conditions
- 3 **Moderate:** Occasionally damp conditions
- 4 **High:** Environments that are often wet
- 5 **Very high:** Extreme conditions

1 2 **3 4 5**

110 SERIES

Brass body with brass shackle and protective cover to protect against knocks, scuffs and corrosion.

TRAILER LOCK

Solid hardened steel construction with anti-saw sleeve featuring a unique disc rotating mechanism. Ideal high security solution for caravans, boats and box trailers.

CHAINS

Enclosed in a vinyl sleeve to prevent damage to paintwork. Flexible and resistant to cutting.

ASSA ABLOY

Lockwood is the leading brand in the Australasian locking industry. With an established reputation for high quality products, this iconic brand provides a wide range of locking solutions to residential housing, commercial building and industrial application markets. Lockwood is supported by an extensive distribution and after-sales support network. Our customers include retailers, architects, trade and industrial personnel, locksmiths and security dealers.

ASSA ABLOY

ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-user needs for security, safety and convenience.

ASSA ABLOY is represented in all major regions, in both mature and emerging markets, with leading positions in New Zealand, Australia, Europe and North America.

As the world's leading lock group, ASSA ABLOY offers a more complete product range of door opening solutions than any other company in the market.
