FEATURES

Provides increased security on timber doors

Fixing Instructions:

1 Fitting bolts

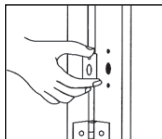

- Select position on door for the two bolts 100mm below top hinge and 100mm above bottom hinge
- In centre of door edge drill 9.5mm diameter holes to a depth of 36mm
- Tap the two bolts in place (smaller diameter end first), gently close the door to allow the heads of the bolts to mark centre position for plates on the frame

2 Fitting plates

- On the frame, in the positions marked by the bolt, drill two 16mm diameter holes
- Locate the plates over the holes and drill 3mm diameter fixing pilot holes 25mm in depth
- Screw the plates in position using 6g x 25mm screws

Note: If required, plate can be rebated flush into frame.
