Why Lockwood padlocks?

- A high quality trusted brand
- A long history of quality and innovation in security products
- A world leader in padlocks
- A wide range of padlocks which ensures the right lock for all purposes

Advanced security

A double locked padlock has greater resistance to pulling and twisting, as found in the 334 padlock series.

Hardened shackle

Lockwood shackles are specially hardened to resist cutter and saw attacks.

Padlock body

Available in a range of materials to suit different applications.

Cylinder (locking mechanism)

Quality cylinder that enables a range of key differs for greater security and resistance to pulling and twisting.

Points to consider when choosing a padlock

Not all padlocks are created equal

The numerous padlocks available in the marketplace may look similar, but many can be easily opened without the key due to poor design and construction. When contemplating a padlock purchase there are five basic considerations to take into account:

LEVEL OF SECURITY

For effective security it is important to match the padlock with the level of security required.

SIZE

Always consider shackle and body size depending on the application.

QUALITY

High quality materials and precision locking mechanism. Lockwood is a trusted household name with a long standing reputation for high quality products.

CORROSION RESISTANCE

The Lockwood range extends from padlocks suitable for dry, protected environments through to extremely corrosive conditions.

KEYED ALIKE

The ability to have one key with multiple padlocks. Twin and quad display packs are available for one key convenience.

Select the right padlock

To help you select the right padlock for the level of security required, a scale has been developed that is quick and easy to follow.

The Lockwood range is divided into four categories: **Handy**, **General Purpose**, **High/Maximum** and **Marine / Weather** security.

Put simply, the scale follows one basic rule: The higher the number, the better the padlock security.

RATING 1 TO 3

HANDY

1 2 3 4 5 6 7 8 9 10

Basic protection for barrier and deterrent applications.

RATING 4 TO 6

GENERAL PURPOSE

1 2 3 4 5 6 7 8 9 10

Good to high security for general purpose applications.

RATING 7 TO 10

HIGH / MAXIMUM

1 2 3 4 5 6 7 8 9 10

High to maximum security for all applications including commercial and industrial.

RATING 7 TO 10

MARINE / WEATHER

1 2 3 4 5 6 7 8 9 10

High to maximum security for non-corrosive protection.

Handy Range Security

Handy range for everyday security needs.

Recommended for: suitcase · letterbox · lockers · small bikes

110 SERIES

A range of padlocks designed for basic protection for barrier and deterrent. Solid brass body, hardened steel shackles with precision cylinders for improved security.

RATING 1 TO 3

1 2 3 4 5 6 7 8 9 10

Basic protection for barrier and deterrent applications.

141 SERIES

A 50mm stainless steel dial type combination padlock with key override for convenient, personalised and keyless security.

150 SERIES

A 25mm, 30mm and 40mm brass case side wheel combination padlock for basic protection or to serve as a deterrent.

150 series padlocks are suitable for use on applications such as luggage and sports bags.

CABLES

Tough zinc coated, multi-core plastic coated cables to ensure strong resistance to cutting attacks. Preset and re-settable combination cable options.

General Purpose Security

Increased protection for medium security needs.

Recommended for: mountain bike · gates · barbeque · garden shed

119 SERIES

Solid laminated steel lock body with a double bolted hardened steel shackle. Available in sizes 30, 40 and 50mm.

RATING 4 TO 6

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

Good to high security for general purpose applications.

120 AND 121 SERIES

Quality brass padlocks with double locking hardened steel shackles and precision cylinders. Protective shrouds in 40 and 50mm padlocks, with extended shackles available in 30 and 40mm padlocks.

LOOPED CABLES

Tough zinc coated, multi-core plastic coated cables to ensure strong resistance to cutting.

HASPS AND STAPLES

Hardened steel construction with strengthening ribs and rolled edges for extra protection.

High / Maximum Security

Top protection for maximum security needs.

Recommended for: motorbike · garage · quad bike · container doors

120N SERIES

Heavy duty solid brass bodies with protective weather resistant silicone jackets. Designed for high security applications and to resist the impact of harsh environments.

RATING 7 TO 10

1 2 3 4 5 6 **7** 8 9 10

High to maximum security for all applications including commercial and industrial.

130 SERIES

70mm cylindrical stainless steel disc lock with a hardened steel shackle. Suitable for high security applications and harsh corrosive environments.

334 SERIES

With brass, steel, stainless steel, and closed shackle options available the 334 series is ideal for those requiring strong, convenient and versatile padlocks.

270 AND 290 SERIES

Heavy duty solid steel case padlocks with a high corrosion resistant molybdenum steel alloy shackle designed for maximum security.

PADBOLTS

High cut resistant hardened steel construction with tamper resistant fasteners included. To be used in conjunction with Lockwood Padlocks for maximum security.

Marine / Weather Security

High to maximum security for non-corrosive protection.

Recommended for: boats · trailers · farm equipment · marine equipment

334 SERIES

Heavy duty solid stainless steel construction with the highest corrosion resistance rating. Suitable where high security and non-corrosive properties are required.

RATING 7 TO 10

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

High to maximum security for all applications including commercial and industrial.

CORROSION RESISTANCE RATING 3 TO 5

- 1 **Very low:** Not applicable for padlocks
- 2 **Low:** Dry protected conditions
- 3 **Moderate:** Occasionally damp conditions
- 4 **High:** Environments that are often wet
- 5 **Very high:** Extreme conditions

1	2	3	4	5
---	---	---	---	---

110 SERIES

Brass body with brass shackle and protective cover to protect against knocks, scuffs and corrosion.

TRAILER LOCK

Solid hardened steel construction with anti-saw sleeve featuring a unique disc rotating mechanism. Ideal high security solution for caravans, boats and box trailers.

CHAINS

Enclosed in a vinyl sleeve to prevent damage to paintwork. Flexible and resistant to cutting.

ASSA ABLOY
