# YDM Home Kit

Handy hints and tips

Turn your smartphone into your key. The intuitive Yale Home app lets you manage the access of your home remotely.*

*When used in conjunction with a Yale Connect Wi-Fi Bridge

3109A&7220_V2023

NOTE: Once the module has been paired with your lock, all programming is done through the Yale Home app. You will only see numbers 1 and 7 on the keypad when you enter menu mode going forward.

DOWNLOAD YALE HOME APP

- The app requires a minimum operating system of iOS 11 Plus for iPhone, and 8 Plus for Android based phones. Bluetooth 4.0.
Yale Home

Download on the App Store

iOS SYSTEM : Once you have the app you can press and hold on the app to share the app to other iphone users.
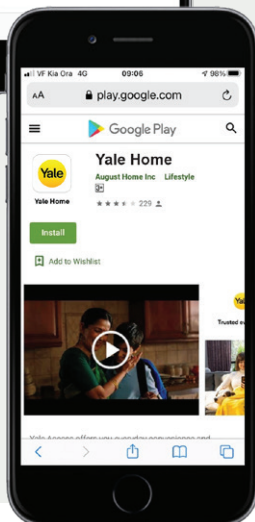

IMPORTANT!

1. Always set up a **master code** at the face of the lock before pairing with the app

2. When downloading the app there is a **dual authentication** process required and as part of this you will be sent a text message with a code in it and then you will be sent an email with code in it

3. Always make sure that you set up your phone with the lock and don't try to install and set up the Connect Wi-Fi Bridge first – **THIS WON'T WORK**

GET IT ON Google Play

ANDROID SYSTEM : For an Android based phone you will need to search for the app in the Google app store, you can save a link to this store in your favourites.

IMPORTANT!

1. Always set up a **master code** at the face of the lock before setting up the app

2. With Android phone this text message number will **auto populate** – it's easy to miss this step and you will be trying to put the text number where the email number should go. Read carefully and take your time! (When downloading the app there is a dual authentication process required and as part of this you will be sent a text message with a code in it and then you will be sent an email with code in it)

3. Always make sure that you set up your phone with the lock and don't try to install and set up the Connect Wi-Fi Bridge first – **THIS WON'T WORK**

SET UP YALE HOME MODULE

- **Insert Network Module First**
- **Wi-Fi bridge cannot be registered** until the module registration is complete.

IMPORTANT!

- Always **remove at least one battery** before inserting the module* (This step allows the lock to recognise the Network Module and begin the pairing)

M PIN I → 7 Module Registration #

- Input your master code at the face of the lock. Using this master code should allow you to bring up the master menu and the screen will display **the numbers 1 and 7.** Once in this screen you can register the module by pressing the **(7)** and then the # symbol. The light on the front of the lock will flash and play a 3 key notes sound to confirm that your Accesss Module is registered to your lock.
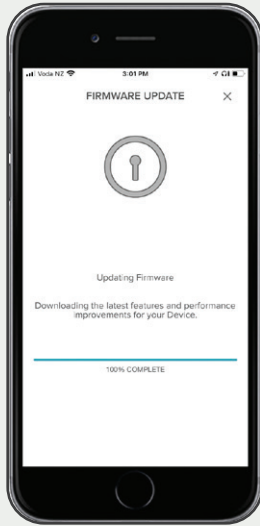

SET UP YALE HOME MODULE

You will open the app to register after the module has been inserted and paired via the keypad on the lock.

QUICK MENU ICON

🖐	Touch the keypad with palm to begin and end actions.	ᴹPIN	Enter Master Code(4~10digits).
1 ~ ▢	Click the indicated number.	ᵁPIN	Enter User Code(4~10digits).
✱	Press [✱] button on the keypad.	ᵛPIN	Enter Visitor Code(Only 4digits).
#	Press [#] button on the keypad.	ᴼPIN	Enter Onetime Code (Only 4digits).
I	Press ①(Registration)button inside of the battery cover.	CARD	Enter User Card Key. (Up to 40ea)
↩	Repeat operation using settings indicated.	U N	User Slot Number should be 2 digits.

TROUBLE SHOOTING

FIRMWIRE UPDATE

If the firmware update stalls at 100%, return to your homescreen (but leave the app running in the background), then reopen the app.

INSTALL CONNECT WI-FI BRIDGE

- Install the Connect Wi-Fi Bridge if you wish to extend the range from Bluetooth to remote access. Please note that before you set it up, make sure your phone is **connected to the WiFi using 2.4GHZ*.**
  Note: Only 2.4GHZ will work with Yale Home

	Alternatively	
The app will prompt you to set up a 'Wi-Fi bridge' once you have registered the module.	Open the app and go to the tab at the top left of the home page, once in here press on **"SET UP A DEVICE"**	**Scan the QR** code (or enter the code as circled), then plug the bridge into a power socket within BLE range of the lock. Follow as instructed by the Yale Home app.

IMPORTANT!

- You won't be able to make the connection if you are using **5GHZ**, but you can change back to 5Ghz once the bridge has been connected.

- The **"signal appears to be weak"** doesn't affect the bridge's performance, continue past this point until the set up is finished.

Yale is trusted by millions of people every day to keep what's important to them safe.

Our innovations have protected their homes, families and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes. Because we always make every effort to push the boundaries in a changing world.

We were there for your grandparents (and probably theirs) and we'll be there for your children.

ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-user needs for security, safety and convenience.
